

Our Local Government & Public Body Services

Life Sciences Healthcare delivers market intelligence, national, regional and local strategy and planning for the Life Sciences and Medtech industry. This includes state of the art technology innovation resourcing and auditing and supply chain mapping and development of channels to market. We work closely with national industry services such as Medilink UK, UKTI and BIS to help develop end to end solutions for government and public bodies by applying progressive Project Management solutions to today's new generation of businesses. Our services include but are not limited to the selection listed below.

Business Strategy and Planning – Mapping Industry

Life Science Healthcare helps clients to develop their business thinking and align these with possible government or arms length initiatives. We also help map market demographics to ensure the best possible coverage for support mechanisms to reach the desired targets and to support especially the knowledge led digital economy.

Business to Business Brokerage

With a direct network of over 3500 CXOs and over 5500 business contacts across the UK we are ready to help you find the right channels to market and to develop new lasting relationships. Strategic sectors covered are: Life Sciences, Medical Technology, Healthcare, Food and Drink, Advanced materials, Laser Photonics, ICT, Big Data and Mobile App technologies.

Innovative Supply Chain and Pipeline Enrichment

Life Science Healthcare develops a strategic needs “mind-map” for you the client. This supports proactive enrichment or resourcing of innovative pipelines. Our team of specialists accelerate technology auditing and product and service development. We support putting in place advisory teams, supply chain and consortia development to accelerate commercialisation.

Strategic human resource development and planning

Through state of the art A.I. tools we deliver: fast, accurate sourcing of ALL staff resources. We can capture ALL organisational knowledge developing faster learning and development processes for individual training plans. Where change management and succession planning is required we can help reduce the cost of mapping staff.

Specialist Networking and Event Management

Life Sciences Healthcare works with its clients to deliver specialist networking events. Alongside this, continued work with International Centres of Excellence (e.g. The STFC's Rutherford Appleton Laboratory) and the Medtech innovation Expo, Life Sciences Healthcare delivers new business partnerships, supply chain and innovation product and service enrichment.
